

1,200V Fuse Protection

With the growing demand for alternate power systems with voltages up to 1,000V Jean Muller has produced a range of DIN fuse links and Disconnectors suitable up to 1,200V AC and 1,000V DC. Current ratings are from 6 amps up to 630A in three sizes all with DIN blade type connections.

The Disconnectors are available in single and three pole designs and provide large cable terminations for ease of cable or busbar connection.

Applications

- 1000V AC traction equipment
- Photovoltaic DC systems
- UPS Systems.
- DC networks

Features:-

- Available in 1 and 3 pole designs
- Up to 1,000V DC
- Up to 1,200V AC
- Mechanical fuse monitor
- From 6A up to 630A
