

Interface Modules with 24 Digital Inputs and 16 Digital Outputs for CNC Machines

New Interface Modules from **connectwell** ease PLC wiring in CNC Machines

The new CNC series modules from Connectwell provide connection possibility for both input and output sides of a PLC in a single module. This new series is compatible with various PLCs from Fanuc, GE, Mitsubishi, Schneider & Siemens. These modules provide interface to the PLC via a 50 pin IDC / FRC header and interface to inputs and outputs via standard screw clamp connections.

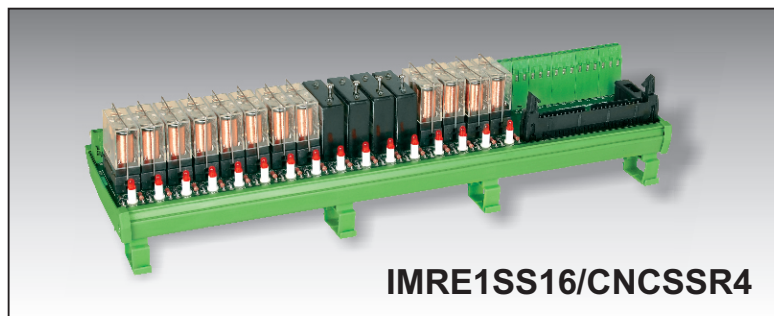

Alternate configurations of these modules are provided with fuse protection on relay outputs and SSR relays in case of high frequency switching.

Feature List:

- o 24 Inputs and 16 Outputs
- o 50 pin DC / FRC interface to PLC
- o Field Input and relay output connection via 2.5 sq.mm. standard screw clamp PCB Terminal Blocks
- o Electro-Mechanical Relay Type: 1 C/O with contact rating of 10A, 250VAC
- o SSR Relay Type: 1 N/O with contact rating 3A, 264VAC
- o Standard Coil Voltage : 24VDC (Non standard coil voltages available)
- o All relay coils fitted with a back emf protection diode
- o Relay coil status indication by red LED
- o Fuse protection at relay output using glass cartridge fuses in Horizontal Fuse Holders
- o DIN RAIL / PANEL Mounting options
