Wire connections with parachutes:

Spring Loaded 'SAFETY' Terminal Blocks

Screw Connections
with Spring Safety

Finger Safe
Connections

CTS4USC

CTS6USC

CTS10USC

NEW Spring Loaded 'Safety'
Terminal Blocks from Connectwell.
If accidentally, the screw clamp is not tightened
the spring acts as a layer of safety,
ensuring that the connection is maintained
by means of the spring tension.

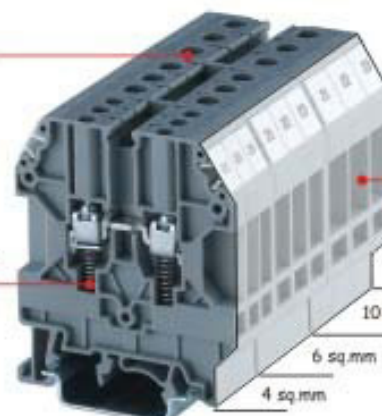

The Spring Loaded Terminal Blocks are suited
for applications - Mining applications,
Rail Network, Electricity Supply Industry,
Petro Chemical applications,
Escalators and Rolling warehouses and
Industrial Robots.

Rated for 1000 Volt applications.

... The Right & Safe Connection

IP20
Finger Safe
design

Safety spring
to ensure
failproof
connections

Large wire entry
to enable use
of two wires
with hook type
lugs

common profile for
all 3 Terminal
Blocks enables
the use of
common end plate
