

Slim is In

In today's high-tech world it has become inevitable that control panels will progressively reduce in size, forcing us to do a lot more in a lot less space.

Connectwell brings you the right solution to such problems in the form of Slim Relays for switching and control applications. Conventional Relay Modules occupy about 25 mm per channel but with Slim Relays the same can be achieved in just **6 mm**.

They come with the additional benefits like being absolutely modular and Din Rail mountable.

This is what we at Connectwell call Sensible Switching...

IMSRxx Series Slim Relays

	Electro Mechanical Relay	SSR DC In - DC Out	SSR DC In - AC Out
Contact Type	1 CO	1 NO	1 NO
Input Voltages	5,12,24,48 VDC	5,12,24,48 VDC	5,12,24 VDC
Contact Rating	6 A @ 250 VAC / 30 VDC	4 A @ 30 VDC	2 A @ 380 VAC
Relay Pitch	6 mm
