

No. 64 Sealing tape

Characteristics

- Suitable for connections using acrylic and epoxy resin compounds
- Corrosion-resistant
- Ozone-resistant
- Self-fusing
- Permanently flexible
- Superior dielectric properties
- Excellent adherence to metal, glass, rubber and plastic
- Superior physical properties
- Synthetic rubber adhesive

Application

- Sealing of cable and conductor interstices
- Repairing of damaged cable sheaths
- Water-resistant sealing of cable entry points
- Dust protection
- Moisture protection
- Corrosion protection

Material

- Butyl- /rubber based

Colour(s)

- black

Type	Lenght m	Width mm	Thickness mm	Art.-No.
No. 64	1.5	38	3.2	125591

Technical data	Value
Dielectric constant	3.1
Dissipation factor (50Hz)	0.0250
Dielectric strength	16 kV/mm
Volume resistivity	1 x 10 ¹² Ω / m
Water absorption	0.1 %
